AT EDEN TURIST SUPERIOR YACHT

SUNDAY:

- **A.M. Baltra (Airport)**

Departure from Quito or Guayaquil to Baltra Island (2 ½-hour flight). Arriving in the Galapagos, passengers are picked up at the airport by our natural guides and taken to a ten-minute bus drive to the pier to board the Eden Yacht.

- **P.M. Bachas Beach(SN/WLK)**

Wet landing. Named for some wrecked World War II barges whose ribs are still visible in the sand this visitor site offers great swimming, a lovely walk along the shore and a visit to a lagoon behind the high tide line with wading birds, marine iguanas and sometimes even flamingoes. The two beaches are also favorite nesting sites for green turtles which often leave tractor-like tracks in the sand.

MONDAY: Genovesa

- **A.M. Darwin Bay (SN/WLK/PR)**

Disembark onto a small sand and coral beach. A short trail heads west along a tidal lagoon and then up a rocky hill that leads to a point overlooking the cliffs and Darwin Bay. Along the trail near the tidal lagoon, visitors will see pairs of Swallow-tailed Gulls, Lava Gulls, Yellow-crowned and Lava Herons.

The trail continues through Palo Santo trees, Opuntia cacti, and Saltbushes inhabited by Great Frigate birds and Red-footed Boobies.

- **P.M. Prince Philip's Steps**

Be marvelled at the variety of sea life that uses the crevices of the lava cliffs for shelter. Red-billed Tropicbirds fly overhead, switching between their nests and the bay, and a small colony of fur seals may be found near the landing site. You will be dropped off at a steep stairway that begins on rocks at the foot of a path that leads through a seabird colony full of Nazca and Red-footed Boobies.

TUESDAY:

- **A.M. Bartolomé (SN/WLK/PR)**

Dry or wet landing. Considered the most iconic landscape of the entire archipelago the view from the top of Bartolome Island, overlooking the famous Pinnacle Rock and the austere Santiago Island beyond, is well worth the climb up the wooden boardwalk. This volcanic scene has often been likened to a lunar landscape. Our subsequent snorkel here might put us face to face with Galapagos penguins, white-tipped reef sharks and playful sea lions.

- **P.M. Bahía Sullivan (SN/WLK)**

We will have a dry landing on Sullivan Bay in Santiago Island to start our walk over a recent lava flow, including very fresh pahoehoe lava formations, lava bubbles containing crystallized minerals and pioneer plants. Along the shoreline, we may find Galapagos penguins and herons going after small fish.

WEDNESDAY:

- **A.M. Black Turtle Cove (PR)**

Here, we can find four species of mangrove in the extensive tidal lagoon system that stretches for almost a mile inland. During our panga ride through the labyrinth we will spot many turtles, herons of several species, sharks and rays. The experience is otherworldly and seems to transport us back to the beginning of time.

- **P.M. Dragon Hill (SN/WLK)**

Dry landing. Arriving to a small lava dock our first encounters are with marine iguanas that blend-in perfectly to the dark rock. As we walk past large prickly pear cacti we arrive to one end of a long, sickle-shaped, beach with Dragon Hill standing in the distance. Our walk takes us on a circular path, past a shallow lake where flamingoes frequently come to feed. Waders such as stilts, turnstones and sandpipers work the muddy edges frenetically looking for food as we continue inland to a dry, forested habitat where land iguanas nest and burrow.

THURSDAY: Santa Cruz

- **A.M. Charles Darwin Research Stations & Fausto Llerena Breeding Center (WLK)**

Dry landing. Once home to the famous Lonesome George, the last tortoise of the Pinta race, the breeding and relocation center is named in honour of his long-time guardian. The center is set in the Galapagos National Park Service where various interpretative buildings are available to visit. The grounds, with large stands of native vegetation, are one of the better places to spot some of the seldom seen Darwin's finches such as the woodpecker, cactus and vegetarian finches.

- **P.M. Baltra (Aeropuerto)**

After the visit, passengers will be transferred to the airport for their return flight to Guayaquil or Quito.
